Somerset House puts street art on the map

GOOGLE Maps has become an urbanite's best friend, but wouldn't it be nice if navigation was a bit more exciting? For a different twist on cartography - the science of drawing maps - London's **Somerset House** is exhibiting works from 50 internationally recognised graffiti and street artists on how they view their home towns. Expect works using digital technologies, sculptures, straight illustrations, video presentations and even performances.

Mapping The City, until February 15, free, somersethouse.org.uk
